Training & examination in 3 days

Practice examination

Excellent first attempt pass ratio

Learn how to apply COBIT® 5 to specific business problems, pain points, trigger events and risk scenarios within the organization, and apply COBIT 5 into their enterprises.

COBIT® 5
Implementation

Business Beam

Introduction

The COBIT®5 Implementation course provides participants with a practical appreciation of how to apply COBIT 5 to specific business problems, pain points, trigger events and risk scenarios within the organization. Participants will learn how to implement and apply COBIT 5 into their enterprise and how to effectively use it for client initiatives.

This course is supported by practical exercises and engaging case-based scenarios. Participants learn how to apply the COBIT 5 continual improvement lifecycle approach to address requirements and establish and maintain a sustainable approach to governing and managing enterprise IT as "normal" business practice.

Learning Objectives

After completing the COBIT 5 Implementation course, delegates will have a thorough understanding of:

> How to effectively analyze enterprise drivers
> Implementation challenges, their root causes and success factors
> How to determine and assess current process capability
> How to scope and plan improvements
> How to avoid potential implementation pitfalls by leveraging good practices.
