Introduction

While the importance of projects is growing worldwide, Risk Management is also getting more and more attention of Project Management professionals and decision makers. In order to acknowledge this phenomenon, Project Management Institute (PMI) has not only published Practice Standard for Project Risk Management but it is has also launched a prestigious certification called as Risk Management Professional (PMI-RMP®). This course is specifically designed to help experienced, knowledgeable project managers and team leaders to master the art of risk management through understanding the Processes, Tools, Techniques and other related concepts as described in Practice Standard for Project Risk Management. The course is very much focused on preparing the training participants to pass the PMI-RMP® certification exam.

Learning Objectives

Candidates should expect to gain competencies in the following areas after successful completion of the training course:

> Principles, concept and techniques of project management in general and risk management in particular

> How to apply these concepts in real life for effective results

> Overview of process groups and knowledge areas of project management

> Risk management processes and how to apply them

> Various internal and external factors, and their influence on the success or failure of a project

> Systematic approach to identify risks, perform qualitative and quantitative analysis, plan risk responses and execution, and monitor and control risks.

Contents

Recommended Participants

This course is designed for project managers and team leaders who are preparing for the PMI-RMP® certification exam. Project personnel and managers who work with projects or with risk management will benefit from a better understanding of how their responsibilities fit into this critical project management aspect.

Prerequisites

Some experience of managing or directing projects or project tasks or performing risk management tasks.

Course Format

The course uses a stimulating mix of instructions, workshops, quizzes, discussions and a practice-exam.

Duration

4 days (30 teaching hours).

Materials Provided

❯ Course reference manual containing copy of course slides, support documents, quizzes and answers
❯ Practice exam
❯ Course Certificate

Practice Exam

A practice exam is part of the course. The practice exam aims to help participants in passing the PMI-RMP certification exam.

Certification Exam

PMP exam is not included in this training course. Candidates interested in PMP examination must submit their application directly at PMI website. After the initial approval, candidates can schedule examination.

The PMP exam is 4 hours long and consists of 200 multiple choice questions. 175 questions are scored and 25 questions are considered as pretest and not scored.
